

A Brilliant Software

Precious – A Software for Diamond and Jewelry Wholesalers

A unique and innovative system that supports the entire workflow of the company, encompassing all of its facets. Precious provides comprehensive management and control capabilities in which the entire business process is automatically tracked throughout the system.

- Complete interaction and coordination between the different departments: merchandising, sales, production, diamonds, gold, shipping, purchasing, and accounting
- Tracking facilities of stock from the incoming of raw materials phase through the final phase of shipping the goods and once again when those finished goods return to company holdings for repairs or as recall
- Handles various type of orders, including Special Orders and Projection Orders
- Detailed and thorough bill-of material design enables the use of common or personal price lists for labor, diamonds and gold
- Managing of the style's life cycle from its initial design through its production and sales phases till its liquidation and dismantling
- Tracking and analyzing of cost changes including real cost vs. designed cost
- Diverse inventory control tools for gold, castings and findings
- Complete and easy-to-use history records
- Rich reports library and an interactive reports generator allows for fast and easy creation of detailed and sophisticated reports
- Complete portability of relevant data to exterior applications such as Microsoft Excel or Acrobat Reader and to other interfaces for reasons of supervision, mobility and marketing
- Advanced tools for database transfer from current systems

A Brilliant Software

Precious Stones – A Software for Diamond Wholesalers

- Coherent, fast and reliable features for **efficient diamond stock control**, including “memo in” inventory
- **Fully Secured system** - advanced permission and authorization mechanism
